MAHI'S RESUME

ABOUT ME

I am currently in my 2nd year giving a chase to BSC IT degree and I will be pursuing my third year in forthcoming month. I have a creative mind as I am a painter too therefore it helps me to lay down my inventiveness into making websites. I am a passionate learner and this field is all about obtaining new skills every day and through different projects. I believe that a well-designed website should not only look visually appealing but also provide a smooth and

enjoyable interaction for the visitors. I am still learning and growing bit by bit and unhurried by gaining knowledge from the internet. This is my first ever website and I take pride in saying that I learned so many new things while doing so. Thank you!!
